# Astral Reports

Astral 365 | www.astral365.com

A powerful yet simple reporting tool created specifically to extract data from
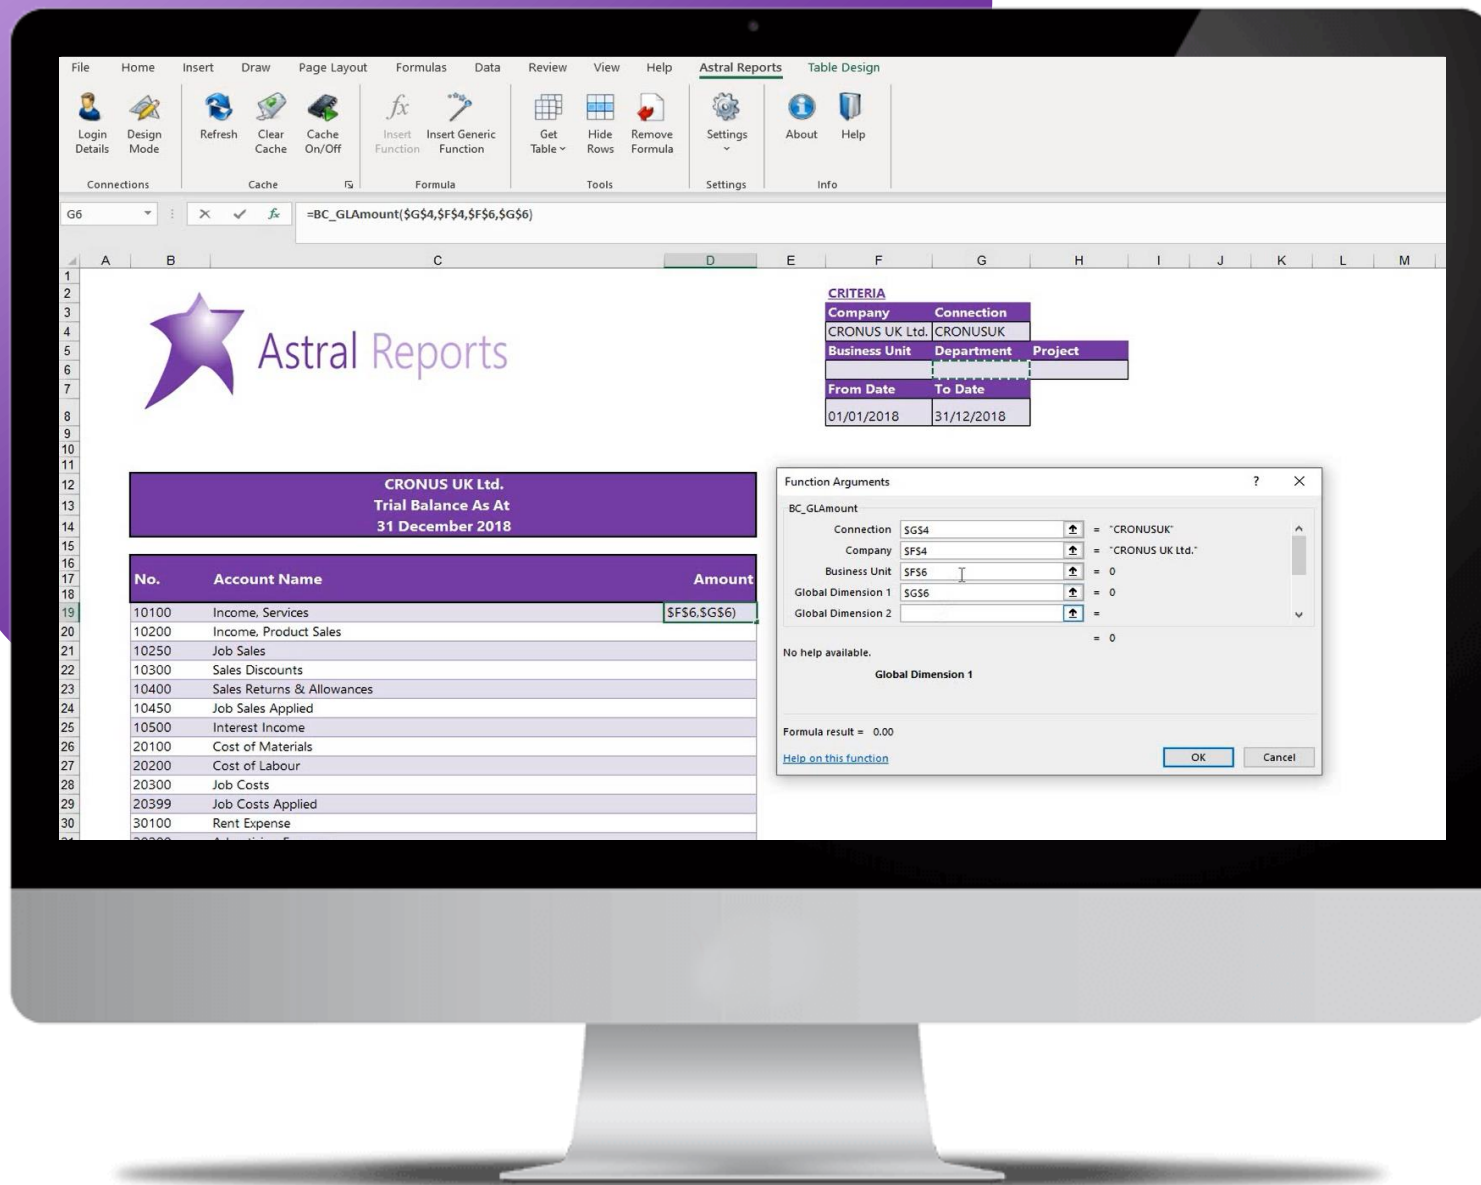

Microsoft Dynamics 365
Business Central

And allow you to view and manipulate it in **Excel**

2

Astral Reports For Business Central

A simple to use reporting tool that utilises the power of excel to build powerful dynamic reports based on live data.

The functions have been designed specifically for 'high level reports', such as Balance Sheet, Profit & Loss or Management Accounts. These are typically summary level reports that do not require vast amounts of transactional data to be extracted from the system. The functions utilise the 'Flowfield' technology within Dynamics 365 Business Central, and as such, each function is tuned to retrieve data from the system in an efficient manner.

Built within Microsoft Excel, expect seamless integration and an intuitive learning experience. The solution was first concieved back in 1997, becoming Astral Reports back in 2004. It is proudly sitting as the most intuitive reporting tool available for Microsoft Dynamics 365 Business Central.

Easily create a **Trial Balance Report** using the **BC_GLAmount** function which is one of the many pre-defined functions that come included.

Astral Reports comes with

Over 170 Predefined Functions

which make it

Powerful Yet Effortless
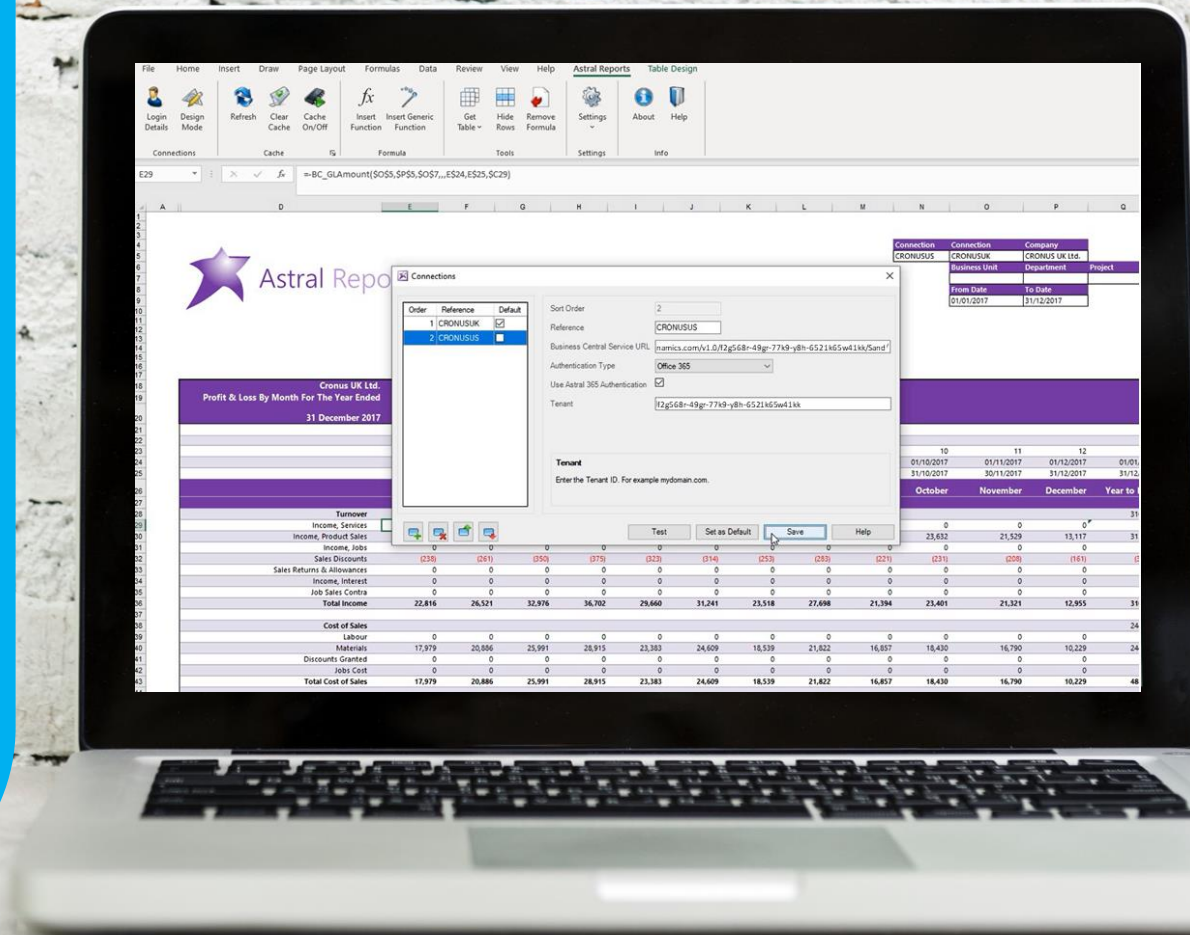

Functions include:

BC_GLName
BC_GLAmount
BC_CustBalance
BC_GLAnalysisAmount
BC_GLBudgetAmount

And many more!

5
